PROFESSIONAL SUMMARY

B.Tech Information Technology graduate experienced in building full-stack applications, RESTful APIs, and LLM-based systems. Proficient in Python, JavaScript, and SQL/NoSQL databases, with a strong focus on clean architecture and thorough testing. Seeking backend, full-stack, or AI engineering roles.

EDUCATION

- | | |
|--|-------------|
| B.Tech Information Technology, College of Engineering Guindy, Anna University, Chennai <ul style="list-style-type: none">CGPA: 7.0 / 10 | 2022 – 2026 |
| HSC & SSLC, Sri Venkateshwara Vidhyalayaa Higher Secondary School <ul style="list-style-type: none">HSC: 89% SSLC: 90% | 2019 – 2022 |

PROJECTS

- MiniPulse – AI Slack Assistant for CRM Insights** | *Python | FastAPI | Gemini API | Slack API | HubSpot | Docker*
- Built a two-service Slack bot that answers natural-language HubSpot CRM queries via a Gemini tool-calling loop
 - Designed six read-only CRM tools behind a single HubSpot client, with HMAC-SHA256 Slack verification and dedup
 - Added guardrails, per-thread context, JSON logs with request tracing, and 39 mocked tests; containerized with Docker
- RentEase – Rental Management Web Application** | *MongoDB | Express.js | Node.js | React.js*
- Developed a full-stack React.js web application with role-based authentication (owner/tenant) using JWT, supporting multiple user flows and real-time data updates
 - Designed RESTful APIs for tenants, bills, payments, complaints, and notifications
 - Implemented MongoDB schemas using Mongoose for structured data handling across multiple modules
- MoneyMate – Expense Tracking Web Application** | *HTML | CSS | JavaScript | PHP | PostgreSQL*
- Developed a full-stack web application to track and split group expenses with automated calculations
 - Designed a responsive dashboard using HTML, CSS, and JavaScript to visualize expense splits and balances across devices
 - Implemented user authentication, group management, and transaction handling using PHP and PostgreSQL
 - Optimized SQL queries (SELECT, INSERT, UPDATE, DELETE) with joins and aggregations in PostgreSQL to manage expense records and generate user balance summaries
- CoralCare – Coral Reef Health Classification using Deep Learning** | *Python | Dual-Stream CNN | Grad-CAM | LIME*
- Designed a dual-stream CNN-based framework to classify coral images into Healthy, Bleached, and Dead categories
 - Applied preprocessing and augmentation techniques including normalization, resizing, and noise reduction
 - Evaluated model performance using precision, recall, F1-score, and confusion matrix; applied Grad-CAM and LIME for explainable AI visualizations

SKILLS

- | | |
|--------------------|--|
| Programming | Python, JavaScript |
| Frontend | HTML, CSS, React.js, Responsive Web Design |
| Backend | FastAPI, Node.js, Express.js, PHP |
| Databases | PostgreSQL, MongoDB, MySQL, SQL |
| AI / APIs | Tool Calling, REST APIs |
| Tools | Git, GitHub, Docker, VS Code, Claude Code, Codex |

CERTIFICATIONS & TRAINING

- Data Analysis and Tableau – Coding Ninjas
- Full Stack Web Development – Coding Ninjas

LEADERSHIP & ACTIVITIES

- Coordinator – NSO, College of Engineering Guindy (organized and led student activities and initiatives)
- Coordinator & Performer – Stunners Variety Team, College of Engineering Guindy
